

Confirm Bulk Operation

Are you sure you want to **Stop All Components** on the following 8 hosts?

The screenshot shows a confirmation dialog for a bulk operation. The dialog has a title bar with a dropdown arrow and the text 'ACTIONS'. Below the title bar, there are three main sections:

- A list of actions: 'Start All Components', 'Stop All Components', 'Restart All Components', 'Reinstall Failed Components', 'Turn On Maintenance Mode', 'Turn Off Maintenance Mode', 'Set Rack', and 'Delete Hosts'. 'Stop All Components' is highlighted.
- A list of components: 'Hosts', 'DataNodes', 'JournalNodes', 'NodeManagers', 'RegionServers', and 'Supervisors'. Each has a right-pointing arrow.
- A summary section: '+ Add New Hosts', 'Selected Hosts (8)', 'Filtered Hosts (8)', and 'All Hosts (8)'. Each has a right-pointing arrow.

The background shows a table with columns: Hosts, DataNodes, JournalNodes, NodeManagers, RegionServers, Supervisors, and Versions. The table has 8 rows, each starting with '8)'. The 'Versions' column contains 'HDP-3.1.0.0'. The 'Supervisors' column contains '23 Components' and '24 Components'. The 'Hosts' column contains '125.91GB'.

If I try to stop all components I am told there is nothing to do as boxes are in maintenance mode.

Nothing to do

All Host Components on selected hosts are already in selected state or in Maintenance Mode.

OK

If I try to turn off maintenance mode I get message it returns message that they are in Maintenance mode ??? What does this mean?

- Start All Components
- Stop All Components
- Restart All Components
- Reinstall Failed Components
- Turn On Maintenance Mode
- Turn Off Maintenance Mode
- Set Rack
- Delete Hosts

Nothing to do

All hosts that you selected are already in Maintenance Mode.
